## FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in board ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been

introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri S. N. Ghosh I. A. S. the Director of Census Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi  
the 26th April, 1982

P. PADMANABHA  
Registrar General, India

## PREFACE

The District Census Hand Book compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Village and Town Directory included in the publication relate to the district of Hugli. A brief analytical note with a number of inset tables based on Census data, included in this publication will hopefully meet the requirements of the readers. As mentioned earlier, the 1981 Census operation in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning, enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are grateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt. Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Hugli (Principal Census Officer) and his innumerable colleagues including the Charge Superintendents. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of data have been done by the central Tabulation Unit of this office under the supervision of Sri Swapan Kumar Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarker, Asstt. Director of Census Operation, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The printing work was supervised very efficiently by Sri S. K. Guha, Investigator, under the able guidance of Sri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Sri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS. Shri B. Bhattacharyya, WBCS., both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta, and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to Dipti Printing & Binding Works for the printing of this publication.

Calcutta

**SUKUMAR SINHA**  
Joint Director of Census Operations  
West Bengal

# ANALYTICAL NOTE

## CENSUS HOUSE

## HOUSEHOLD

## HOUSEHOLD CHARACTERISTICS

## INVESTIGATION

## ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows.

- (a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.
- (b) All other places which satisfied the following criteria :
  - (i) A population of 5,000 as the minimum,
  - (ii) Density per square kilometre would be a minimum of 400, and
  - (iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation. Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, i.e. it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

## CENSUS HOUSE

We defined the census houses in the following manner :

"A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use.

## HOUSEHOLD :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both."

## SCHEDULED CASTES/SCHEDULED TRIBES :

We have our own list of Scheduled Castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe found in the notified list. For a household belonging to scheduled caste or scheduled tribe, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

## LITERATES

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

### MAIN WORKER :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other viz. main workers marginal workers and non-workers.

The 1961 Census definition of worker as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly. .... There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons. .... participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census anyone who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceeding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceeding enumeration. All workers have been categorised in four distinct parts viz. (i) cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) other workers in 1981 Census. This is a major departure from 1971 categories of workers. In 1971 Census the workers, were divided in nine categories.

### MARGINAL WORKERS :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding enumeration.

### NON-WORKERS :

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggars etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

### DISTRICT CENSUS HANDBOOK :

The District Census Handbook was started printing from 1951 Census. The Government and the Development agencies left necessity of the data at micro-level for the social and economic development all over the country during the post independence

era. Until then, the compilation of data was limited to district, police station and town levels only. In 1951, it was extended to the mouza level.

The publication programme of district census handbook of 1951 continued undisturbed in 1961 also and it was enlarged with the introduction of official statistics.

The major changes in the District Census Handbook publication were introduced in 1971. The District Census Handbook 1971 was divided into three parts *viz.* Part XA, Part XB and Part XC. The first part dealt with village and Town Directories. In Village Directory the village-wise data on amenities available was given and the information in respect of each town was given in the Town Directory. The Part XB consists of village and town-wise (ward-wise for municipalities, town committees and all statutory towns) Primary Census Abstract of the concerned district.

The third part i.e. Part XC dealt with the non-census data and social, economic and cultural tables. All the three parts were printed either in two volumes i.e. Part XA and XB and Part XC or in three volumes Part XA, Part XB and Part XC separately according to the size of the districts.

The scope of District Census Handbook 1981 has been enlarged considerably specially in relation to the amenities available in the villages and towns and landuse pattern in villages and non-municipal towns. The collection of data on recognised slums of Class I and Class II towns of the state is a new addition of 1981 in the Town Directory portion of the District Census Handbook.

The format of the primary census abstract have been restructured due to the change of economic questions. The data on marginal workers collected through the canvassing of individual slips is an important addition. Workers have been categorised in four sectors instead of nine in 1971.

#### Scope of Village Directory

A twenty column format was canvassed during 1981 Census period for collection of data from each and every mouza within each police station. This is called village directory. The mouzas within a police station have been represented in order of their location codes. This twenty column format has been divided in four parts. The column nos. 1-4 represent general information, columns nos. 5-14 represent amenities available, column nos. 15 to 19 are meant for landuse pattern and the column 20 contains special information in respect of historical, archaeological and religious interest about the mouza. At the end of each police station, the totalling has been done for col. nos. 3 to 6 and 15 to 19. If any amenity is not available in the village a dash '-' has been marked in the relevant column and next to it the distance of the nearest place where the facility is available has been given in the broad ranges.

The following systems were followed for indicating educational institutions, if any, located within the villages. The abbreviations used for the educational institutions are also given below :—

#### 1. Primary or Elementary School (P)

All nursery, kindergarten, pre-basic, pre-primary, Junior Basic School upto Class V and Primary School upto Class IV have been included in this group.

#### 2. Junior Secondary or Middle School (M)

All schools from Class V to Class VIII including Junior Madrasa upto Class VIII have been noted in this group.

#### 3. Secondary School (H)

All schools upto Class X including the schools providing Senior Cambridge Course and High Madrasa upto Class X have been treated as high school.

#### 4. Higher Secondary School (PUC)

All educational institutions where the education is imparted for Class XI and XII have been marked for this group.

While collecting the data according to the pattern as stated above certain limitations were imposed. We have considered only those institutions which are recognised by any competent authority and the specific classes of a school upto which recognition has been given. In case of composite schools like secondary schools with middle classes and primary classes or middle schools with primary classes, the relevant groups of classes have been treated separately, e.g., a composite school having classes upto XII(Twelve) has been divided as follows :—

Classes from	I to IV	..	(P)
"	V to VIII	..	(M)
"	IX to X	..	(H)
"	XI to XII	..	(PUC)

It is to be noted that by dint of the above kind of division, we are not going by how many educational institutions physically exist within a village, but by occupying of classes each group being treated as a school of its kind. It is also to be noted that the said groupings will hold true irrespective of the educational institution they belong to. For example, the grouping marked as PUC i.e. Class XI and Class XII may physically belong to a college, but for the purpose of the Village Directory, these two classes taken together has constituted one unit of PUC, the rest of the classes has been treated as a college.

#### 5. College (C)

Any college with the disciplines of Arts, Science and Commerce have been grouped here.

#### 6. Industrial School (I)

#### 7. Training School (Tr)

#### 8. Adult literacy Class/Centre (AC)

#### 9. Other educational Institutions (O)

(Sanskritole, senior basic school, Makhtab etc. have been noted as others).

It is needless to mention once again that in sl. no. 5 to 9 the institutions having recognition from any competent authority have been taken into account.

In case of more than one institution of a type in the village, the number of institutions have been indicated in brackets. If any of the educational institutions as stated above is located in a village the existence of other types of educational institutions located in nearest village(s) have not been collected. Suppose, a Primary school is functioning in the village, but there is no middle or high school in the village under reference, in this case, we have not indicated the distance of the nearest place where a middle school or a high school exists. Similarly, if there is a high school only in a particular village, no efforts are given for collecting distance of a nearest place where a primary or middle school exists. The distance by ranges of a nearest place where educational facility is available have been collected from villages having no facility of any of the above mentioned nine categories of educational institutions.

In the medical fields there are a variety of amenities. These are indicated with abbreviations whether within the village exists any of the following medical institutions :—

Hospital	..	H
Maternity Home	..	MH
Child Welfare Centre	..	CWC
Health Centre	..	HC
Primary Health Centre	..	PHC
Primary Health Sub-centre	..	PHS
Dispensary	..	D
Family Planning Centre	..	FPC
TB Clinic	..	TB
Registered Private Practitioner	..	RP
Community Health Worker	..	CHW
Others	..	O

The information have been collected in respect of those institutions only which are organised and/or aided by Government/Semi-Government/Public bodies/local bodies/social service agencies like the missionaries. The institutions run by private individuals have not been covered. But the information on Registered Private Practitioners of any branch have been noted. If there are more than one facility in the village, the same have been indicated in appropriate abbreviations. In case of more institutions of a type in the village, the number of institutions have been indicated against the abbreviations in bracket. Where no amenity is available within the village, a dash (—) has been shown in relevant column and any of the facilities as given above available in a nearest place have been noted showing the distance in broad ranges.

The sources of drinking water available within the village have been indicated by codes as follows :—

Tap	=	T	Fountain	=	F
Well	=	W	Canal	=	C
Tank	=	TK	Lake	=	L
Tubewell	=	TW	Spring	=	S
Hand Pump	=	HP	Nallah	=	N
River water	=	R	Others	=	O

If there are more than one source of drinking water in the village, the same have been indicated in appropriate abbreviations in the relevant column. In absence of any source of drinking water in the village, a dash has been given in the relevant column and next to it the distance in broad ranges of the nearest place where any of the aforesaid facilities is available has been given.

The Post & Telegraph amenities available within the village have been collected by codes as given below. The post office includes Branch and Sub Post Offices also. The villages having no facilities in respect of Post & Telegraph, have been marked by dash (—) in the relevant column and next to it the distance in broad ranges of the nearest place where any of the facilities as given below is available has been noted.

Post Office	=	PO
Telegraph office	=	TO
Post & Telegraph office	=	PTO
Telephone connection	=	Phone

The information on hat, market have been collected for each village. The day(s) of the week on which market/hat is held have been taken into account. Where the market/hat held daily in a village, it has been recorded as "daily". In absence of hat / market in the village, the distance in broad ranges of the nearest place have been shown where it is held.

It has been looked whether the village is served by any mode of public transport like bus, rail and waterways and the abbreviations adopted for this purpose are given below :—

Bus	..	BS
Railway Station	..	RS
Navigable waterways (including river, canal, etc.)	..	NW

If there is more than one facility in the village, these have been indicated separately by individual codes as given above. If no facility is available within the village, a dash is shown in the column and next to it in brackets, the distance in broad ranges of the nearest place where the facility is available is given.

Approach to the village refers to the state of roads leading to the village from the communication centre. The approach to village has been indicated by following abbreviations :—

Pucca Road	..	PR
Kucca Road	..	KR
Navigable River	..	NR
Navigable Canal	..	NC
Navigable waterway (other than river or canal)	..	NW

If there is more than one approach to a village, the same has been given by appropriate codes in the relevant column.

The name of the nearest town and its distance in kilometers from the village has been collected. The nearest town so indicated may not be located within the state of West Bengal, this may be located in the neighbouring state also. The operational conveniences have only been taken into consideration while collecting this information. Only those towns have been considered, which have been declared urban according to 1981 Census,

The facilities of power supply have been collected from the village where it is available in the following codes :—

Electricity for Domestic consumption	ED
Electricity for Agricultural Consumption	E. Ag.
Electricity for other purposes like industrial, commercial etc.	EO
Electricity for all purposes listed above	EA

Where the power is consumed for more than one purpose, this has been indicated accordingly.

The staple food, only in terms of grains, consumed by the majority population of the village during the major portion of the year have been recorded. The grains may be rice, wheat, jawar, maize etc. Sometimes a combination of these grains have been consumed by the villagers as the staple food. In that case, it has been indicated as reported.

The land use pattern of the village has been presented in five broad categories. These are as follows :—

**1. Forest—**

.. This includes all lands classed as forests under any legal enactment dealing with forests. This may be owned by the state or by any private individual. Land maintained as potential forest land have also been treated as forests. Any area used for any other purpose but situated within the forest so defined, is treated as 'forest'.

**2. Irrigated land—**

.. It relates to the land which has actually been irrigated under different types of irrigation for the purpose of cultivation. The sourcewise break-up of area in hectares under different systems of irrigation has been given. The codes in respect of sources have been noted as under :

Government Canal	GC
Private Canal	PC
Well (without electricity)	W
Well (with electricity)	WE
Tube well (without electricity)	TW
Tube well (with electricity)	TWE
Tank	TK
Lake	L
River	R
Waterfall	WF
Others	O

**3. Unirrigated land—**

All areas under rainfall crops or under dry rice cultivation have been classified as unirrigated areas.

**4. Culturable Waste—**

It is defined as the lands within cultivated holdings have not been cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles. Land under thatching grasses, bamboo bushes and other groves for fuels etc., which are not included under orchards or forests and land grazing, meadows have also been included in this category.

**5. Area not available for cultivation—**

This stands for barren, uncultivable land and land put to non-agricultural use. Barren and unculturable lands cover land within cultivable holdings which cannot be brought under cultivation without incurring a high cost. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals etc.

Any important place of religious, historical and archaeological interest within the village have also been mentioned in the village directory. Information on the number of copies of newspapers coming in the village, and motor cycles / scooters / cars / Jeeps and tractors available in the village have been mentioned accordingly and denoted the following codes :—

Newspapers	..	N
Motors cycles / scooters	..	M
Cars / Jeeps	..	C
Tractors	..	T

In addition to the information that have been collected through Block Development Office, the following four appendices to the Village Directory have also been compiled :

- I. Police Stationwise abstract of educational, medical and other amenities,
- II. Land utilisation data in respect of non-municipal ( non-statutory ) Census Towns,
- III. Police Stationwise list of villages where no amenities are available.
- IV. Police Stationwise list of village according to the proportion of scheduled castes / scheduled tribes population by ranges.

The first two appendices have been provided for obtaining actual position regarding various amenities available in the police station and as well in the district and the land utilisation pattern in the non-municipal census towns which have been treated urban by virtue of the criteria prescribed for urban units. Appendix-III has been devised for planning input in areas where basic infra-structure is lacking. Appendix-IV has been prepared for the purpose of planning of welfare programmes for scheduled castes and scheduled tribes at micro-level, particularly in relation to the area development oriented programmes.

### Scope of Town Directory

The Town Directory has been prepared for all the statutory towns like, Municipal Corporation (MC), Municipalities (M), Notified Areas (NA), Town Committee (TC) and Cantonment areas as well as the non-statutory census towns (NM) including the outgrowths. The particulars about each town have been presented in seven statements each dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IVA is a new addition in town directory statements. It covers the information regarding demographic, civic and other amenities available in the notified or recognised slums having a population of 50,000 or more. The towns having outgrowths has been identified with the asterisk mark (\*) and the information available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In that case information not available (NA) has been quoted in the respective column.

The population of each town during 1981 Census has been considered for determining the class of towns. All the towns have been divided into six classes according to the range of population. They are as follows :—

1. Population one lakh and above	..	Class I
2. Population from 50,000 to 99,999	..	" II
3. Population from 20,000 to 49,999	..	" III
4. Population from 10,000 to 19,999	..	" IV
5. Population from 5,000 to 9,999	..	" V
6. Population less than 5,000	..	" VI

A brief discussion on seven statements is given below :—

#### Statement I :

This statement provides some basic data based on the primary census Abstract. It deals with the status and growth history of the town. The column no. 1 to 5 gives information on class, civic status, name of the town and its location code with the police station the town belongs to. The area of the town in square kilometer has also been given. The column no. 6 to 19 give demographic information of the town. Where the town did not have any urban status for the reference year(s), a 'dash' (—) has been given under these column(s). The decadal growth in percentage has been shown below the population figures from column no. 8 to 15. The status of the statutory towns has been fixed as on April 1980.

**Statement II :**

The statement deals with the physical aspects and location of the town as on April 1980. This statement is divided into two. First dealing with the climatological data which include rainfall and maximum-minimum temperature. The information on climatological aspects are not available in respect of some of the towns. In that case the information noted from the nearest place where it is available. This alternative however, could not be followed uniformly due to the fact that the data are not available for the nearest place even. In such cases the information not available (NA) has been stated. In the second part i.e. in column nos. 6 to 12 the locational particulars have been stated for the referent town.

**Statement III :**

Data on municipal finances for the year 1978-79 have been presented relating to the civic administration of the statutory bodies. The information in respect of the non-municipal census towns have also been collected wherever available and have been shown in the statement. The information on finances have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census town having no information has been marked with information not available (N.A.).

**Statement IV :**

This statement contains 19 columns. The column nos. 1 to 5 provide general information of the town and the column nos. 6 to 19 deal with the amenities having in the referent town. Where the town is not served by the fire fighting services or its own, the name of the nearest place from where the referent town gets services has been given. In absence of any of the public amenities, as referred to in cols. 6 to 19 the relevant column has been depicted suitably like dash (—) which means amenities not available and information not available (NA) respectively.

**Statement IV A :**

Information about notified or recognised slums have been given in this statement. The information is limited to the slums located in Class I and Class II towns only. The civic and other amenities that are being available to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been submitted separately for each slum.

**Statement V :**

This statement deals with the medical, educational, recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions run by or aided by Government, semi government, local bodies, charitable Institutions, Social Service Agencies like Missionaries etc. have been counted. Where these facilities were not available, the distance of the nearest place where these facilities are available has been noted. The Family Planning Centres attached to hospitals or Maternity and Child Welfare Centres or Primary Health Centres have been treated as separate units. The maternity and Child Welfare Centres, Venereal Disease Clinic, Chest Clinic and Leprosy Clinic etc. have been treated as independent institutions and indicated in "Others" category of medical institutions.

While presenting the data on educational institutions, the same procedure as in village Directory has been followed in respect of the school and college education. The column 6 includes educational institutions like Teachers' Training College, Basic Training College, etc. The information on shorthand, typewriting and other vocational training Institutions have been given in column 10. In this case only the recognised institutions have been considered. "The recognised" means recognised by any statutory authority — like the Education department, commerce department, labour department, etc. of the Government or Semi-Government or autonomous bodies, public sector projects like municipality, corporation, etc.

The vocational institutions like Music/Dancing school, Art College, painting/ Clay-modelling institutions etc. have been covered under col. 10. The institutions which are not included in cols. 6 to 14 have been taken in col. no. 15 under "Others". The columns 17-20 deal with the recreational and cultural facilities of the town.

**Statement VI :**

This statement contains particulars of Trade, Commerce and Industry of the town. It also depicts information on Banking institutions like Banks, Agricultural Credit Societies and non-agricultural credit Societies.

The details of abbreviations used in different statements of Town Directory are given below :—

## Analytical note

**Brief history  
of the district**

The district remained under Hindu rule till the 13th century like other parts of the country. The northern part of the district had passed into the hands of Muhammadan conquerors by 1298 A. D. Tribeni, and afterwards Saptagram was the head quarters of the Muhammadan Governors. Saptagram was a mint town and the earliest coin minted at Saptagram being dated 1329 A. D.

Saptagram had become a sub-province of Muhammadan Bengal during the period 1324-51 at the time of Delhi Suzerainty. It continued to be the seat of local government and a mint town during 1358-1390 under Bengal Sultans. The extent of the Governorship of Satgaon varied according to the vigour of the government but the limits were extended beyond the river Damoder at the time of Hussain Shah in 1493-1520. Shershah gained control in 1536 but shortly afterwards, the last independent Hindu king of Orissa seized the country upto Tribeni. But the king of Orissa was driven out by the army of Sulaman Kararani in 1567-68. There was almost incessant warfare throughout the second half of the sixteenth century. At the turn of the seventeenth century, Mansigh restored the place. The importance of satgaon town was diminishing with the decline of its trade. But it continued to be the seat of the local governor. But it was gradually superseded as a commercial centre by Hugli with its large portuguese trade. The Emperor ShahJahan destroyed the portuguese settlement of Hugli and captured the fort and survivors were sent to Agra in 1631. Since then Hugli become the royal port of Bengal and the Governor's head quarters was removed from Satgaon to Hugli. The district preceded with peace and prosperity for more than a century. The sea bourne trade flourished, though the portuguese commerce had fallen off. The English, French, Dutch, Danes, Flemish and Germans, all had settlements on the banks of the Hugli. The period marked several important administrative changes. Three settlements of land revenue took place. The radical land reforms were introduced by Murshid Kuli Khan in the second settlement which took place in C1722. He divided Bengal in 13 chaklas and retaining the parganas, though in some cases subdivided. Under this arrangement Hugli district fell under two chaklas viz. Hugli or Satgaon and Burdwan. In the third settlement which was conducted C 1728 divided the country into Khalsa lands consisting of (1) Large and small zamindars and sayar or customs etc. and (2) the jagirs of the Faujdars. The Hugli district was divided and was put under a faujdar or military governor.

Hugli was taken by the Marathas after 1739 for a short period. In October 1742, Bhaskar Pandit was defeated at Katwa by Ali Verdi Khan. Again, Hugli returned under the Nawab of Bengal. The town, Hugli was plundered by Englishmen in 1757 in an expedition, and a treaty was made between Clive and Watson with the Nawab. Next the Englishmen captured the French fort of at Chandernagore. In June, 1757, the battle of Plassey made the British supreme in Bengal.

After 1760, there were a number of administrative changes. In 1772, Burdwan was including Hugli. The Bengal was divided into 14 districts, of which Hugli was one of them. In 1774 civil administration was transferred to Amils and the control of police and criminal work to foudjars. The system was changed again in 1780 with a separate civil court with each of six divisions. Hugli district lay mainly in the Barddhaman collectorate.

Twenty Four Parganas formed a separate collectorate under Hugli. In 1795, the district Barddhaman divided into two parts, the northern division being called Barddhaman and the southern division Hugli. The collectorate of Hugli was separated from Barddhaman on the 1st May, 1822. The first subdivision came into existence in 1845 at Serampore and the other at Kshirpai; now in Medinipur, which was later shifted to Arambagh. The Subdivision Arambagh was finally delimited in 1879. The next change in the area of the district was effected when on 2nd May 1950, the Government of India took over the french territory of Chandernagore. Subsequently Chandernagore Subdivision was created on 2nd May, 1954. The latest change took place in July, 1966 when the village Shalapur was added to the Hugli district from the Raina Police Station of Barddhaman. Since then, the district more or less have the present boundaries.

### Physical Aspects

The district Hugli lies between the latitudes  $22^{\circ} 39' 32''$  and  $23^{\circ} 01' 20''$  in the northern hemisphere.

The eastern most extremity of the district is marked by  $88^{\circ} 30' 15''$  east longitude and its Western most extremity by  $87^{\circ} 30' 20''$  east longitude. The head quarters town Hugli-Chinsurah is situated on the Western bank of the river Hugli at  $22^{\circ} 55'$  north latitude and  $88^{\circ} 24'$  east longitude. The district covers an area of 3149.0 square kms.

The district is bounded on the north by the district of Barddhaman, on the east by the river Hugli, on the South by the district of Haora, and on the West by the districts of Medinipur, Bankura and Barddhaman. The climate of the district may be divided into four seasons. They are hot summer from March to May, South-West Monsoon from June to September, Post monsoon from October to first half of November and the cold season covering rest of the year.

The general appearance of this tract of land particularly of the portion lying between the Hugli and Dwarakeswar is a flat-alluvial plain. This portion is intersected by a number of sluggish rivers and streams. But on the whole, this part of the country slopes gradually from the north and west towards the south and according to the courses of the rivers, streams and drainage channels. The monotony of the flat alluvial plain which occupies almost the entire area of the district is somewhat detracted by raised village sites and high river banks, by a sandy ridge east of Dwarakeswar running close to Kana Dwarakeswar and artificial river embankment.

The District may be divided into two main natural divisions viz. the uplands and the plains. The river Dwarakeswar is the dividing line between the two. The uplands are confined to the area contained in the triangular projection on the West of the Dwarakeswar. This area is mainly covered by the police station Goghat stretching over 375.65 sq. kms. which is less than one eighth of the total area of the district. The uplands are undulating with rocky soil and the ruins of low laterite are found mixed with alluvium. The western most corner of the district presents a distinctly rocky land.

The river system in this district includes firstly the large rivers which are only three in number, secondly the small streams and lastly, village channels. The course of the larger rivers have determined the physiography of the district and give rise to the smaller streams. The smaller streams are generally the tributaries of the larger rivers and generally flows from north to south. These smaller streams are fairly numerous in number and they serve the purpose of drainage in the district. The three rivers which are large in size are the Hugli, forming the eastern boundary of the district, the Damodar separating the Arambagh Subdivision from the rest of the district and Dwarakeswar dividing the district in two distinct parts. The smaller streams viz. the Behula, the Kananadi, the Kunti, the Saraswati, the Kausiki, the Kana Damodar, the Madaria, the Beria or Sankibhanga, the Mundeswari, the Kana Dwarakeswar, the Sankara, the JhumJhumi, the Amodar, and the Taraguli are worth mentioning.

### Major characteristics of the district

(1) The district is not rich in forests. Only 0.29 thousand hectares of land were put under forests till 1976-77. More than 80% of the forest areas were in the form of Reserved Forests while the remaining portion were classified as unclassed State Forests and lands.

(2) There are no mines of any kind in the district, but sand is exported in large quantities from Magra in particular and also from different areas of Polba, Singur and Haripal Police Stations. The Magra sand is fine in quality. These have been deposited in large quantities by Damodar and its distributories before they changed their courses to the present beds.

(3) The power is supplied to the district by the West Bengal State Electricity Board and a small area of the district derives power from the Calcutta Electric Supply Corporation. All the 26 towns in the district have electricity except Makhila (NM) which could not furnish the information of having the electricity or not. The district has 1899 inhabited villages of which 949 were electrified.

(4) The classification of land use area in the district, Hugli as a whole as on 1976-77 is given below :—

(i) Net cropped area—232.43 thousand hectares	
(ii) Land put to non-agricultural uses 62.65 thousand hectares	
(iii) Barren and unculturable waste 0.03 thousand hectares	
(iv) Miscellaneous tree crops and groves 7.12 thousand hectares	
(v) Culturable waste	9.55    "    "
(vi) Other Fallow land (Other than current Fallow) 1.10 thousand hectares	
(vii) Current Fallow	1.31    "    "

(5) According to 1981 census, 51.88 percent of the total workers of the district are engaged in agricultural pursuits. Although the district Hugli is one of the most important district in West Bengal in regard to the setting up of industries flanking the river Hugli, it still remains its basic rural character. In the year 1976-77, the total area covered in production of foodgrains was 267.4 thousand hectares of land. During the same year rice was cultivated in 231.1 thousand hectares of land, wheat in 27.4 thousand hectares, pulses in 8.9 thousand hectares and oil seeds in 8.6 thousand hectares. The fibres mainly jute was cultivated in 33.7 thousand hectares of land. The total food grains produced in 1976-77 were 433.4 thousand tonnes of which cereals produced to the extent of 428.1 thousand tonnes. Of the cereals, rice produced to the tune of 372.1 thousand tonnes while wheat was 56.0 thousand tonnes. The fibres produced during 1976-77 were 367.4 thousand bales (180 kgs in each thousand bale) of which jute and mesta were 366.0 and 1.2 thousand bales respectively.

The yields per hectare of land in 1976-77 were 1610 kgs. for rice and 2043 kgs. for wheat. As regards irrigation facilities in the district, the area covered by the canal net work of the Damodar valley Barrage and irrigation spreads over 72,381 hectares in 1976-77. The Kangsabati project canals commanded a total area of 12755 hectares. The benefits derived through minor irrigation schemes were deep tubewell, river lift irrigation and shallow tubewells. By the end of 1977, 240 tubewells, 260 shallow tubewells were sunk and the 361 pumping plants relating to the river lift irrigation had been in operation.

(6) Industry play a vital role in the economy of the district of Hugli. According to the house census, held in the August-October 1980, 13745 Census houses of the District were occupied exclusively by the factories, workshops and worksheds. Again, workshops-cum-residence including household industry covered 12260 census house. The Bandel Thermal Power Plant is a Large-scale industrial establishment in the district in public sector. Among those of the private sector, the most important establishments are (1) Hindustan Motors Limited, at Uttarpara—the largest automobile manufacturing unit in the country, (2) The Dunlop Rubber Company India, Ltd. at Sahaganj producing rubber tyres, tubes and various other rubber products (3) The Alkali & Chemical Corporation of India Ltd., at Rishra which produces Polythene (4) Isha Shree Textiles and Industries Ltd., at Rishra manufacturing textile products (5) J. K. Steel at Rishra Producing Jute baling hoops and (6) Kesoram Raoyan at Bansberia manufacturing rayon grade pulp. The following registered factories were found in the district till 1977 :—

Name of Industries	Number
1. Canning of food and vegetables	1
2. Rice Milling (by power machine)	10
3. Bread making	1
4. Manufacture of 'Khandesari Sugar'	1
5. Manufacture of hydro-genated oils Banaspati, ghee etc.	2
6. Manufacture of other edible oils and fats i. e. mustard oil, groundnut oil, til oil etc.	2
7. Manufacture of ice	1
8. Distilling, rectifying, blending of spirits	1
9. Production of country liquor and today	1
10. Cotton spinning and weaving	9
11. Weaving of cotton textiles in power looms	3
12. Cotton textiles not elsewhere classified	8

13. Spinning and weaving of silk textiles	3
14. Spinning and weaving of synthetic fibre—rayons, nylons etc.	3
15. Spinning and weaving of jute and masta	12
16. Manufacture of jute bags and other jute textiles not elsewhere classified	1
17. Manufacture coir products not elsewhere classified	1
18. Manufacture of made up canvas good (tents, sails etc.)	1
19. Manufacture of other textiles not elsewhere classified	1
20. Manufacture of wooden boxes, barrels etc, except of plywood	2
21. Manufacture of Paper	2
22. Manufacture of packaging paper ( Machine made)	1
23. Manufacture of Paper boards and straw boards ( Machine made)	1
24. Manufacture of hand made pulp, paper, board etc.	1
25. Manufactures of other paper and paper board articles	2
26. Manufacture of tyres and tubes for motor vehicles, tractors and aircrafts	1
27. Manufacture of tyres and tubes for cycles	1
28. Miscellenaous rubber industrial and domestic good (bushes, washers etc.)	2
29. Other rubber products	1
30. Plastic moulded industrial accessories not elsewhere classified (like knobs, radio cabinet. picture etc.)	2
31. Manufacture of basic heavy inorganic chemicals	4
32. Manufacture of basic heavy organic chemicals	2
33. Manufacture of inorganic Fertilisers	2
34. Manufacture of organic Fertilisers	1
35. Manufacture of paints, lacquers, varnishers etc.	1
36. Manufacture of Allopathic medicines	5
37. Manufacture of hair dressings / oils	1
38. Manufacture of drug intermediaries	1
39. Manufacture of other chemical products	1
40. Manufacture of hollow glass ware (bottles, Jars etc.)	2
41. Manufacture of laboratory glass ware	1
42. Manufacture of insulators	2
43. Manufacture of hume pipes and other cement and concrete products (including slabs, poles, pillars and screens)	2
44. Manufacture of casting and forgings	13
45. Manufacture of pipes	1
46. Manufacture of wire drawings	2
47. Tool making	1
48. Melting and refining of metal	1
49. Manufacture of fabricated metal product	1
50. Manufacture of structural metal product	2
51. Manufacture of bolts and neets	1
52. Manufacture of general hard ware	1
53. Manufacture of parts and accessories of hand tools and hard wires	1

54. Manufacture of other hand tools and general hard ware	1
55. Manufacture of other metal works except machinery	3
56. Manufacture of steam engines and turbines	1
57. Manufacture of Jute machinery	2
58. Manufacture of size reduction equipment	1
59. Manufacture of size separation unit	1
60. Manufacture of others including general jobbery engineering	1
61. Manufacture of electric motors	2
62. Manufacture of insulated wires and cables	1
63. Manufacture of motor cars	1
64. Manufacture of instruments (Pressure temperature etc.)	1
65. Generation and transmission of electric energy	1
66. Distribution of electrical energy	1
67. Manufacture of gas and its distribution	1
68. Water supply	2
69. Cold Storage	8
70. Sanitation and similar services	1
71. Technical and vocational institutions	1
72. Repair of enterprises not elsewhere classified	1

In addition to the aforesaid registered factories the registered small scale industrial units, 4936 in number, have been spread over in the different parts of the district.

(7) The chief exports of the district are, rice and paddy, pulses, vegetables, cotton and handloom cloth—specially those called Farasdanga, jute, ropes and gunny bags, bricks and tiles, sand and rubber tyres-tubes etc. The principal imports of the district are rice, wheat, salt, tobacco, spices, kerosene, petrol, coal and lime. The principal marts of the district are Chandernagore and Sheoraphuli. The important articles of agricultural produces passing through the marts of Sheoraphuly, Champadanga, Tarakeswar, Bowbazar—Khalisani, and Pandua are potatoes, jute, bananas, oil—cake and molasses. Bulk of these arrivals is despatched out side the district.

(8) The district is well connected by road and rail. Of the 4 subdivisional head quarters of the district three are connected by the Eastern Railway main line. There is no railway line in any part of the Arambagh Subdivision. The national highway and the state highway are passing through the district and covering about 108 kms and 130 kms road length within the district. Till 1977, The district was served by 1066 kms. Extra Municipal roads maintained by public works and Public Works (Roads) Department. In the same year, the district had Extra Municipal Roads of Zilla Parishad to the extent of 1321.44 kms. All the municipalities of the district of Hugli owned 744.42 kms. road length in 1976.

#### Places of Religious, historical, archacological and tourist interest

Of the religious places in the district, the most notable is 'Shiva' temple of Tarakeswar. It is a major place of pilgrimage of Hindus in Eastern India. The temple dedicated to Sri Ram Krishna Paramhansadeva in Kamarpukur under the Police Station

Goghat, the Hindu temple dedicated to Shiva locally called Sri Sri Sandeswar jiu in Chinsurah town, the temple dedicated to Haneswari or Kali in Bansberia town, another temple dedicated to Ananta Deva or Vishnu which contains the remarkable examples of Bengal terracotta in Bansberia town, the temples dedicated to Lord Krishna, Rama and Sri Chaitanya in Guptipara of Balagarh Police Station, and the temple with five instances of Bengal terracotta dedicated to the God Chandi in Balagarh village are worth mentioning. In addition to the above, Ananda Bharabani temple and a temple of Jagaddhatri in the village Somra in Police Station Balagarh, the temple of Gobinda Jiu in Sripur village of Balagarh Police Station, the temple of Kali Anandamayee in the village Sukharia in the Police Station Balagarh, the temple dedicated to Jagannatha at Mahesh and the temple of Radha ballabh (Krishna) located at Ballavpur in Serampore Police Station, the Nimai Tirtha Ghat where the Hindu Pilgrims take water of the Ganges on the beginning of the trek to Tarakeswar in the Police Station Serampore are notable.

The Bandel Church built by Portuguese round about 1660 is the oldest Christian Church in West Bengal. It is located in Chinsurah Police Station. The second oldest christian church in West Bengal dedicated to St. John, the Baptist, established in 1697 is situated in Chinsurah town. It is known as Armenian church.

The Imambara of Hugli in the Police Station Chinsurah is a notable place of Muslim Worship. It was completed in 1861. It commands a fine view of the Hugli river.

The Bandel Thermal Power Plant is a fine object of interest of the people. It is situated in the village Tribeni in the police station Mogra. Another object of interest in the district is Prabartak group of Institutions in Chandernagore town. The memorial hall at the site of birth place of Raja Rammohan Ray, a famous Indian Renaissance is found in the village Radhanagar in Goghat Police Station.

The ruins of two forts in the village Mandaran of Goghat Police Station, the remains of a tower about 39 metres high, two ruined mosques and the tomb of shah Sufi who conquered the Hindu capital—all are in Pandua—are places of interest in the district. The relics of Saptagram or Satgaon in Mogra Police Station the major ancient maritime port of Bengal on the river Saraswati is of great importance to the archaeologists.

### Analysis of data

It is a census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District Census Handbooks 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District Census Handbook 1981 follows the same manner as in 1951 and 1961. A large number of inset tables has been prepared in Town Directory, Village Directory and Primary Census Abstract to make the analysis more scientific and acceptable.

**TABLE—1 DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES**

Number (with percentage) of villages having one or more of the following :

Sl. No.	Name of P. S.	No. of inhabited villages	Education	Medical	Drinking Water	Post & Telegraph	Market/Hat	Communication	Approach by pacca road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Goghat	204 (176)	86.27 (24)	11.76	(204) 100.00	(37) 18.14	(12) 5.88	(55) 26.96	(49) 24.02	(65) 31.86
2	Arambagh	152 (144)	94.74 (55)	36.18	(152) 100.00	(43) 28.29	(11) 7.24	(51) 33.55	(52) 34.21	(58) 38.16
3	Khanakul	144 (136)	94.44 (65)	45.14	(144) 100.00	(42) 29.17	(19) 13.19	(51) 35.42	(40) 27.78	(42) 29.17
4	Pursurah	50 (49)	98.00 (27)	54.00	(50) 100.00	(24) 48.00	(2) 4.00	(5) 10.00	(14) 28.00	(37) 74.00
